Basic and Accentuation Modules

wir812 - Environmental Law

Module label	Environmental Law	
Modulkürzel	wir812	
Credit points	6.0 KP	
Workload	180 h	
Verwendbarkeit des Moduls	<ul style="list-style-type: none"> • Master's Programme Business Administration, Economics and Law (Master) > Basismodule • Master's Programme Business Administration, Economics and Law (Master) > Mantelmodule (MPO2020) • Master's Programme Business Administration, Economics and Law (Master) > Schwerpunktmodule NM-Recht • Master's Programme Business Administration, Economics and Law (Master) > Schwerpunktmodule RdW - Recht • Master's Programme Business Informatics (Master) > Module der Wirtschafts- und Rechtswissenschaften (Master) • Master's Programme Computing Science (Master) > Nicht Informatik • Master's Programme Sustainability Economics and Management (Master) > Basic and Accentuation Modules 	
Zuständige Personen	<p>Meyerholt, Ulrich (Module counselling)</p> <p>Godt, Christine (Module responsibility)</p> <p>Lehrenden, Die im Modul (Prüfungsberechtigt)</p>	
Prerequisites		
Skills to be acquired in this module	<p>Building on the existing knowledge of the participants, the course will deepen knowledge of European and international law, whereby emphasis will be laid on those areas in which the dividing line between state intervention (public law) and market rights (private law) has become blurred. Students will be able to analyze contemporary regulatory techniques inherent in the multilevel system of governance and to assess them from an interdisciplinary (economic and legal) perspective.</p>	
Module contents	<p>The module comprises two courses, one of which will be taught by PD Dr. Meyerholt, and the other together with Prof. Godt.</p> <p>The first course deals with selected issues in environmental law. With the general structure of environmental law as a point of departure, the course content will be taught in a holistic manner that will also incorporate the leading decisions of the higher courts.</p> <p>The second course takes into consideration intra-disciplinary environmental law as situated between public and private economic law, whereby special focus will be laid on the European and international dimensions.</p>

Prerequisites	No
Skills to be acquired in this module	<p>- Knowledge on the basic concepts and strategies of sustainability management related to corporate practice:</p> <ul style="list-style-type: none"> * Sustainability: Basic concepts, strategies, * Domestic and international challenges for business, * Business case for sustainable development, * Integrative concepts of sustainable corporations, * Sustainable strategies, * Management instruments <p>- Discussing topics of international sustainability management with students from different scientific disciplines.</p> <p>- Ability to present and evaluate different concepts and instruments of international sustainability management</p>
Module contents	<p>This module consists of a one lecture and one seminar (2 weekly contact hours per lecture/seminar) dealing with basic concepts and strategies of sustainability management within corporations. Both, lecture and seminar give an overview of current sustainability strategies for companies and present a variety of instruments to integrate and initiate sustainable development within corporations. While the lecture focuses more on theoretical approaches and introduces basic concepts of corporate sustainability management, the seminar provides a variety of case studies and business cases to demonstrate different concepts and instruments of sustainability management. The seminar provides the possibilities for inter- and transdisciplinary exchange and discussions.</p>

Prerequisites		
Skills to be acquired in this module	<p>The Introduction to processes and systems of the dynamic Earth constituting the foundation for sustainable management is presented to produce:</p> <ul style="list-style-type: none"> • Knowledge about processes and systems relevant for sustainable management using knowledge and methodologies from all science disciplines in an integrated way. • Skills in elaborating on complex tasks of environmental management using an interdisciplinary science based approach and to present related findings to non-expert audiences. • Lecture room presentations and discussions based on slides and black/white board usage. <p>Short films will be presented to endorse the intended achievements.</p>	
Module contents	<p>Lecture: Understanding the Bioplanet Earth (2 contact hours/week) (Vorlesung, 2 LVS: Aufbau und Entwicklungsgeschichte der Erde; Dynamik der Erde: Kreisläufe und Evolutionsprozesse; Lebensraum Boden; Wasser; Klima; Biodiversität; Lagerstätten und Ressourcenerschließung; Ökosysteme der Erde.) Seminar: Cases in Understanding the Bioplanet Earth (2 contact hours/week)</p> <p>Introduction to key processes and to systems dynamics of the Earth representing a planet being alive driven by external and internal forces interacting with biological activities. Topics of the lecture comprise introductions to the evolution of the universe and solar systems, the differentiation and sub-systems of the Earth's interior, minerals and rock cycle, soils, ocean and climate, evolution and biodiversity, organisms and physiology, water and element cycling plus insights into ecosystems under different climate conditions. The cases are selected in order to (i) highlight certain principles and theories in geo- and biosciences and (ii) exemplify critical objects and phenomena in modern practice of resource and environmental management. This module consists of topical programmes of the Master Cluster Environment and Sustainability.</p>	
Literatureempfehlungen	A 'foundation material pool' will be made available online for students and lecturers providing paper books, reports and media covering the topics of the lecture and the cases

inf651 - Environmental Management Information Systems I

Module label	Environmental Management Information Systems I
Modulkürzel	inf651
Credit points	6.0 KP
Workload	180 h
Verwendbarkeit des Moduls	<ul style="list-style-type: none">• Master's Programme Business Administration, Economics and Law (Master) > Schwerpunktmodule NM - interdisziplinär• Master's Programme Business Informatics (Master) > Akzentsetzungsmodule der Informatik• Master's Programme Computing Science (Master) > Angewandte Informatik• Master's Programme Environmental Modelling (Master) > Mastermodule• Master's Programme Sustainability Economics and Management (Master) > Additional Modules
Zuständige Personen	Marx Gomez, Jorge (Module responsibility) Lehrenden, Die im Modul (Prüfungsberechtigt)
Prerequisites	
Skills to be acquired in this module	<p>This module completes the knowledge and abilities gained in the field of Environmental Informatics and it creates a strong reference to up to date topics in the field of sustainability. The content taught in this module can directly be applied in an upcoming study and professional career.</p> <p>Professional competence The students:</p> <ul style="list-style-type: none">• are able to classify and explain the sustainability paradigm• are aware of the current status of sustainability reporting• are able to define and to model material flows• have obtained know-how in the field of corporate environmental management information systems (CEMIS) <p>Methodological competence The students:</p> <ul style="list-style-type: none">• implement CEMIS• apply different techniques and methods to case studies• develop new case studies in teams <p>Social competence The students:</p> <ul style="list-style-type: none">• are supposed to work in teams and therefore have to identify working packages and have to take on responsibility for the jobs assigned to them• present and discuss their own results with the team and the other members of the course <p>Self-competence The students:</p> <ul style="list-style-type: none">• learn about their own limitations and learn to accept criticism in order to strengthen their own abilities
Module contents	<p>This course teaches methods, approaches and techniques in the field of information processing in order to support solutions to problems that arise from companies' impact on the environment. In particular, ICT supported approaches of production-integrated environmental protection, environmental controlling and reporting are introduced and discussed. In order to enable the integration of such approaches into environmental protection, environmental management and its systems are taught as well.</p> <p>The content in detail:</p> <ul style="list-style-type: none">• environmental management as a basis for sustainability• sustainability and material flow management• strategic environmental management• eco-controlling life cycle• characteristics and system architectures of CEMIS• standard software systems

- environmental accounting systems

Zuständige Personen	Marx Gomez, Jorge (Module responsibility) Lehrenden, Die im Modul (Prüfungsberechtigt)
Prerequisites	
Skills to be acquired in this module	<p>This course aims at examining emerging research questions in the field of corporate environmental management information systems (CEMIS). After finishing this course, the students will have extensive knowledge regarding Business Environmental Informatics. In addition, they will be aware of recent research topics and challenges as well as relevant software solutions and practical projects.</p> <p>Professional competence The students:</p> <ul style="list-style-type: none">• will obtain extensive knowledge in the field of CEMIS• know emerging research questions and challenges as well as software solutions and projects <p>Methodological competence The students:</p> <ul style="list-style-type: none">• find their own solutions or apply already existing approaches to new and unsolved questions in the field of CEMIS• capture required data, analyse it and present it to their team or the whole group <p>Social competence The students:</p> <ul style="list-style-type: none">• are supposed to work in teams and therefore have to identify working packages and have to take on responsibility for the jobs assigned to them• present and discuss their own results with the team and the other members of the course <p>Self-competence The students:</p> <ul style="list-style-type: none">• learn about their own limitations and learn to accept criticism in order to strengthen their own abilities
Module contents	<p>A strong social pressure forces enterprises to question their current way of implementing their business and to include different aspects of sustainability into their strategies and operational actions. Such a rethinking of one's business is supported by corporate environmental management information systems. Such systems aim at optimising the energy and resource usage, emission and waste minimisation as well as production integrated environmental protection. Of course they support the fulfillment of legal requirements such as waste management or hazardous material handling.</p> <p>The module will cover:</p> <ul style="list-style-type: none">• recent and emerging research questions and topics related to the field of CEMIS as well as Business Environmental Informatics.• discussion and hands-on experience of standard software systems and newly established solutions.• applying the knowledge obtained to the definition of new as well as on solving new case studies.

lök210 - Practice of Nature Conservation

Module label	Practice of Nature Conservation
Modulkürzel	lök210
Credit points	6.0 KP
Workload	180 h
Verwendbarkeit des Moduls	<ul style="list-style-type: none"> • Master's Programme Landscape Ecology (Master) > Vertiefungsmodule zweites Fachsemester • Master's Programme Sustainability Economics and Management (Master) > Additional Modules • Master's Programme Water and Coastal Management (Master) > Science
Zuständige Personen	<p>Buchwald, Rainer (Module responsibility)</p> <p>Mose, Ingo (Module responsibility)</p> <p>Buchwald, Rainer (Module counselling)</p> <p>Mose, Ingo (Module counselling)</p> <p>Buchwald, Rainer (Prüfungsberechtigt)</p> <p>Dörfner, Inken (Prüfungsberechtigt)</p> <p>Mose, Ingo (Prüfungsberechtigt)</p> <p>Fartmann, Thomas (Prüfungsberechtigt)</p> <p>Tent, Nathalie (Prüfungsberechtigt)</p>
Prerequisites	Completed ecology-oriented Bachelor course
Skills to be acquired in this module	<p>With the successful completion of the module the students will gain a general and advanced knowledge of crucial approaches and instruments of nature conservation in Germany and Europe, especially of the implementation of large protected areas (NSG, biosphere reserve, national park etc.), of maintenance/management projects and measures as well as of approaches to their integration into nature conservation and regional development strategies (via agriculture, tourism etc.) in co-operation with national park administrative authorities and other relevant actors. Additionally, the module gives basic skills in developing ecological connectivity systems (example dragonflies) as well as in developing and implementing approaches to ecological planning inside and outside the nature reserves.</p> <p>Ranking/position of the module within the course of studies: The module focuses on problems, methods, results, and analyses relevant to nature conservation and refers to corresponding issues of modules in Bachelor courses as well as of basic modules in Master courses of Landscape Ecology.</p>
Module contents	<p>a) Seminar "Protected areas and regional development": Survey of the most important types of large protected areas in Europe as well as current concepts of integrating the purposes of conservation with the tasks of regional development especially in peripheral rural areas</p> <p>b) Seminar "Introduction to the German Nature Conservation Law": This course deals with some parts of the Nature Conservation Law of Germany and Lower Saxony and discusses their relevance to the actual Nature Conservation policy in Northwest-Germany.</p> <p>this seminar takes place in the winter term</p> <p>c) Field course "Habitat connectivity": Theory of ecological connectivity including causes and impacts of fragmentation and isolation in nature-near biotopes; investigation of migration and dispersal behaviour in selected dragonfly species of ditch systems</p> <p>d) Excursion "Protected areas": Presentation of a selected large protected area in Germany or Europe especially considering geographical, floristic, faunistic, historical, agricultural, and nature conservation aspects as well as aspects of landscape and economics</p>

Zuständige Personen	Lehrenden, Die im Modul (Prüfungsberechtigt)			
Prerequisites				
Skills to be acquired in this module	<p>The students should be enabled</p> <ul style="list-style-type: none"> • to adapt the marketing concept to sectoral, functional and institutional specifics, • to apply specific concepts and methods of marketing in a problem-oriented way and to be able to reflect their conditions and limitations, • to develop and present your own conceptual designs in a team. 			
Module contents	<p>Marketing initially started as a producer-oriented concept and in recent years has developed as universal approach to influence market transactions. Against this background institutional, functional and sectoral fields of application inspired the formulation of sophisticated marketing approaches, like e.g. marketing of non-profit-organisations, strategic marketing, or service marketing. The course presents the specific nature of the different fields of application and relevant consequences for marketing planning. Given the recent inflation of "hyphenated conceptions" of marketing, a reasoned diagnosis as to marketing's core identity is put forth. To this end, perspectives of transfer and integration between the approaches will be developed, that measure up to state-of-the-art theoretical as well as practical demands towards marketing as a universal market-oriented way of managing businesses. This course is divided into a preparatory seminar and an educational workshop towards the end of the term. The latter unit allows case study and role play as well as the presentation student work and boosts social competences irrespective of subject matter.</p>

Module label	Development directions in Marketing Research
Modulkürzel	wir829
Credit points	6.0 KP
Workload	180 h
Verwendbarkeit des Moduls	<ul style="list-style-type: none"> • Master's Programme Business Administration, Economics and Law (Master) > Schwerpunkt Führung von Unternehmen und gesellschaftliche Organisation (FUGO) (MPO2020) • Master's Programme Business Administration, Economics and Law (Master) > Schwerpunktmodule RdW - BWL • Master's Programme Business Administration, Economics and Law (Master) > Schwerpunktmodule UF - BWL • Master's Programme Sustainability Economics and Management (Master) > Additional Modules
Zuständige Personen	Lehrenden, Die im Modul (Prüfungsberechtigt)
Prerequisites	Successful completion of the entrance examination
Skills to be acquired in this module	<p>Upon completion of the module, students will be able to:</p> <ul style="list-style-type: none"> • apply specific competences to strategic research in marketing • classify research strategies in marketing according to their meta-theoretical considerations • estimate research strategies' claims to knowledge and their limitations • formulate interdisciplinary research strategies aligning competences of empirical methods with the application of theory • develop own conceptual sketches within teams and to present them
Module contents	<p>How is knowledge generated within the scholarly discipline of marketing? This question confronts the field of marketing with central paradigmatic assumptions. The course begins to solve this puzzle on the basis of a historical analysis of the marketing concept's development. Different scientific standpoints in marketing theory and empirical investigation are evaluated against the light of recent developments in markets and society. The current paradigms of consumption research and marketing research's basic standing in the philosophy of science are intensely treated. This also entails reflecting on the opportunities that alternative trends, e.g. a humanistic paradigm, hold in store for marketing research. The course is divided into a preparatory seminar and an educational workshop towards the end of the term. The latter unit allows case study and role play as well as the presentation student work and boosts social competences irrespective of subject matter.</p>

Skills to be acquired in this module	The aim of the course is to acquire an understanding of key issues of competition theory and competition policy. This comprises the fundamentals of industrial economics, the tradeoff between market power and efficiency, and the practice of competition policy in Europe.			
Module contents	The module consists of two courses. Course A deals with the theory of monopoly, the theory of oligopoly, cartels and market entry and the welfare analysis of market structure. Course B deals with topics in international regulatory and competition policy, especially monopoly regulation, economies of scale vs. market power in transnational markets, aims and instruments of European regulatory and competition policy.

wir938 - Eco-Venturing

Module label	Eco-Venturing			
Modulkürzel	wir938			
Credit points	6.0 KP			
Workload	180 h			
Verwendbarkeit des Moduls	<ul style="list-style-type: none"> • Master's Programme Business Administration, Economics and Law (Master) > Schwerpunktmodule NM-BWL • Master's Programme Business Administration, Economics and Law (Master) > Schwerpunktmodule RdW - BWL • Master's Programme Business Administration, Economics and Law (Master) > Schwerpunktmodule UF - BWL • Master's Programme Sustainability Economics and Management (Master) > Additional Modules 			
Zuständige Personen	<p>Fichter, Klaus (Module counselling)</p> <p>Lehrenden, Die im Modul (Prüfungsberechtigt)</p> <p>Fichter, Klaus (Module responsibility)</p>			
Prerequisites	none			
Skills to be acquired in this module	<p>The main target of the "Eco-Venturing" module is to develop entrepreneurial skills for the development and implementation of environmental innovations and sustainable business ideas. These include:</p> <ul style="list-style-type: none"> • the ability to identify new solution needs in the context of sustainable development and the sustainable development goals set by the United Nations, • Knowledge and skills for the entrepreneurial development and implementation of innovative solutions, • Knowledge and skills for systematically combining economic (Eco-nomical) and ecological (Eco-logical) objectives and • the ability to strategically develop "green" business areas and markets. • The entrepreneurial development and implementation of environmental innovations can relate both to the establishment of new companies and organisations and to the development of new solutions and business ideas within the framework of established companies and organisations (corporate venturing). 			
Module contents	<p>The main focus of the Eco-Venturing module is the development of new or established business start-up concepts. Under of guidance of their lecturer, participants will work together with selected regional business partners who are both economically successful and contribute to the protection of the environment and the climate, to promote such start-up concepts. What these concepts have in common is that they address the issue of sustainability.</p>

Reference text	<p>The module "Eco-Venturing" is part of the Master's programme "Sustainability Economics and Management (SEM)" and focuses on "Eco-Entrepreneurship".</p> <p>The module "Eco-Venturing" can be taken either individually or in combination with the two other modules of the study focus "Eco-Entrepreneurship" ("wir 920: Advanced Entrepreneurship", "wir 832: Innovation Management"). Two of the three modules must be taken in order to be recognised as a specialisation. The Eco-Venturing module is mandatory (cf. examination regulations for the Master's programme SEM, § 4, para. 4).</p> <p>The module Eco-Venturing is also available for students of the Master's programme WiRe in the ManECo area and can be credited as the module Advanced Entrepreneurship (wir849 Advanced Entrepreneurship). The same applies to students of the Master's programme in Business Informatics. Here it can also be proven as wir849 Advanced Entrepreneurship</p>

Skills to be acquired in this module	<p>Die Studierenden</p> <ul style="list-style-type: none"> • erwerben Kenntnisse des maritimen (zivilistischen) und des marinen (öffentlichen) Seerechts und deren Verschränkung in den Rechtsebenen und mit dem kontinentalen Wasserrecht. • sind in der Lage, seerechtliche Fragestellungen zu analysieren und lösungsorientiert zu bearbeiten. • können Forschungsfragen interdisziplinär entwickeln und bearbeiten. 	
Module contents	<p>Das Modul "Marine & Maritime law in Europe" beinhaltet zwei Veranstaltungen mit jeweils 28 SWS. Die Veranstaltung "Marine Law" behandelt das öffentlich-rechtliche Seerecht, das die Zuordnung und Nutzung der Seeressourcen regelt (Fisch, Seewege, Energie [Wind, Öl, Gas], Verklappung, Schutzgebiete, deep sea mining und Bioprospektion, Küstenschutz). Die Veranstaltung "Maritime Law" behandelt den internationalen Seeverkehr. Themen sind die Beförderung von Gütern auf dem Seeweg (u.a. Haag-Visby Regeln), die Haftung für Güterverluste, Unfälle, Kollisionen, Bergung und Sanierung, sowie Hafenrecht und Schiffsbau.</p>

Skills to be acquired in this module	<p>Die Studierenden</p> <ul style="list-style-type: none">• verstehen internationale, europäische und nationale themenbezogene Rechtsnormen und Rechtsfragen.• wenden internationale, nationale und europäische themenbezogene Rechtsnormen an.• erlernen die englische Rechtsterminologie.
Module contents	<p>Das Modul richtet sich an Studierende, die bereits eine wissenschaftliche Vorbildung haben. Studierende sollen in das neue Recht der Forschung und Nutzung von Pflanzen eingeführt werden, das sie sowohl als angehende Wissenschaftler als auch als Mitarbeiter in der Industrie oder Verwaltung brauchen. Im Prinzip hatte bereits die Konvention über die Biologische Vielfalt (1992) den Grundsatz zum freien Zugang zu biologischen und genetischen Ressourcen völkerrechtlich aufgehoben. Durch die Umsetzung in Europa (2014) und den Ressourcenstaaten sind diese Regeln nun aber bindend geworden. Das hat weitreichende Konsequenzen für den Forschungsalltag und die Produktentwicklung. Diese neuartigen Regeln, in denen die internationale Kooperation schon zu Beginn der akademischen und kommerziellen Forschung zur Pflicht geworden ist, werden den Studierenden nahegebracht. Inhaltlich sind die folgenden Themengebiete für die Lehrveranstaltungen relevant:</p> <ul style="list-style-type: none">• Internationale Rahmenbedingungen für den Zugang zu genetischen Ressourcen und Vorteilsausgleich• EU-Recht und ausfüllende mitgliedstaatliche Regeln zur biologischen Forschung an und Nutzung von genetischen Ressourcen, Traditionellem Wissen und Technologietransfer• Nationale Vorschriften der Ressourcenstaaten für das Aufsuchen genetischer Ressourcen bei wissenschaftlichen Feldstudien und kommerzieller Bioprospektion (z.B. Genehmigungspflichten; Prior Informed Consent; Mutually Agreed Terms; Due Diligence)• Recht der verschiedenen kommerziellen, gesetzlichen und akademischen Ex-situ-Sammlungen genetischer Ressourcen (Practices of databases / Prinzipien und Praktiken der Datenbanken)• Code of Conduct der deutschen Forschungseinrichtungen (vor allem DFG)• Genetische Ressourcen und Geistiges Eigentum• Good practices / Bewährte Verfahren (selected ex situ collections)• ABS agreements ("Mutual Agreed Terms")/ Verträge• Legislative options / Legislative Optionen

Prerequisites				
Skills to be acquired in this module	<p>In today's highly dynamic business environment, innovation is the key to the success of most firms. Moreover, technological and organizational innovations represent valuable instruments for achieving progress toward sustainable development. Against this background, this module familiarizes students with the tools and processes for managing innovation and for developing overall more innovative firms. The module comprises a lecture and a seminar. In the lecture, students become acquainted with the drivers to and role of innovation; they learn about designing innovative firms and developing innovation strategies; they get to know the different sources of innovation; they familiarize themselves with the methods for choosing between alternative planned innovations; they learn how innovation is implemented; and they understand how innovation benefits are exploited. The accompanying seminar is supposed to familiarize the students with select advanced topics surrounding the management of innovation. Moreover, the students train their skills in working in teams, in working with scientific literature, in academic writing, and in presenting in front of a large audience.</p>			
Module contents	<p>Organizational change, creative destruction, ambidexterity, exploration, exploitation, absorptive capacity, sustainability transitions, innovation models, innovation networks, innovation strategy, innovation ecosystems, diffusion of innovations, organizational routines, entrepreneurship, new ventures, etc.</p>

inf501 - Environmental Information Systems

Module label	Environmental Information Systems			
Modulkürzel	inf501			
Credit points	6.0 KP			
Workload	180 h			
Verwendbarkeit des Moduls	<ul style="list-style-type: none"> • Master Applied Economics and Data Science (Master) > Data Science • Master's Programme Business Informatics (Master) > Akzentsetzungsmodulare der Informatik • Master's Programme Computing Science (Master) > Angewandte Informatik • Master's Programme Environmental Modelling (Master) > Mastermodule • Master's Programme Sustainability Economics and Management (Master) > Additional Modules 			
Zuständige Personen	<p>Vogel-Sonnenschein, Ute (Module responsibility)</p> <p>Lehrenden, Die im Modul (Prüfungsberechtigt)</p>			
Prerequisites				
Skills to be acquired in this module	<p>The module gives an overview of the phases and important aspects of the environmental information processing. **Professional competence** The students: - apply basic processing algorithms to classify and process data - compare, evaluate and design data structures to store spatial data efficiently - apply basic functions of a geo-information system - describe, evaluate and apply basic processes of data mining - describe, evaluate and apply basic geostatistics processes - evaluate and apply multicriteria decision making processes **Methodological competence** The students: - use geoinformation systems for environmental application - use data mining tools for data analysis **Social competence** The students: - solve tasks in teams of 2-3 students - present and discuss their solutions in class **Self-competence** The students: - reflect their own behaviour with regard to the methods of environmental informatics</p>			
Module contents	<p>Content of the Module: Environmental information systems make information about the general environmental state available for public management and public facilities, enterprises or interested citizens. The collection, storage and evaluation of this information is interesting for computer science. Within the scope of the lecture we will examine the processing of environmental information step-by-step, this means: - problems of data acquisition and data processing, - data structures and database concepts for an efficient access to (usually) spatial data, - introduction of data analysis (in particular from geostatistics and data mining), - introduction of multicriteria decision processes, as well as - the supply of data supported by meta data. The module "Umweltinformationssysteme" is accompanied by the module "Modellbildung in Simulation ökologischer Systeme". The subjects of "Modellbildung in Simulation ökologischer Systeme" represent the dynamic aspects of environmental systems (mainly of ecological systems). Nevertheless, the modules can be taken independently from each other.</p>

Skills to be acquired in this module	<p>Ziel des Moduls ist, den Studierenden interdisziplinäre Perspektiven auf die Beratung (Themen, Personen, Qualifikation) im besonderen Fokus der Begleitung von Gründungsvorhaben näher zu bringen. Das Modul „Gründungsberatung“ bietet Studierenden die Möglichkeit, sich sowohl wissenschaftlich als auch anwendungsorientiert mit den Besonderheiten und (zukünftigen) Professionalisierungsherausforderungen der Beratung von Gründern/Gründerinnen zu beschäftigen. Zugleich erhalten Sie Einblicke in die Gründerszene. Über die Einbindung eines Gründungsteams als Fallstudiegeber eröffnet sich den Studierenden die Gelegenheit, ihr Beratungskonzepte unter realen Bedingungen zu entwickeln, zu testen und zu evaluieren.</p>	
Module contents	<p>Das Modul dient der individuellen Profilbildung der Studierenden und fördert zugleich fachliche, methodische und soziale Kompetenzen. Hierunter fallen:</p> <ul style="list-style-type: none"> - Beratungselbstverständnisse und –konzepte - Besonderheiten der Gründerszene - Projektorientiertes Lernen - Gruppendynamische Prozesse

wir886 - Digital Transformation: Strategies and Sustainability

Module label	Digital Transformation: Strategies and Sustainability
Modulkürzel	wir886
Credit points	6.0 KP
Workload	180 h (4 SWS (56h))
Verwendbarkeit des Moduls	<ul style="list-style-type: none"> • Master Applied Economics and Data Science (Master) > Specialization • Master's Programme Business Administration, Economics and Law (Master) > Schwerpunkt Führung von Unternehmen und gesellschaftliche Organisation (FUGO) (MPO2020) • Master's Programme Business Administration, Economics and Law (Master) > Schwerpunktmodule NM-BWL • Master's Programme Business Administration, Economics and Law (Master) > Schwerpunktmodule RdW - BWL • Master's Programme Business Administration, Economics and Law (Master) > Schwerpunktmodule UF - BWL • Master's Programme Sustainability Economics and Management (Master) > Additional Modules
Zuständige Personen	Lehrenden, Die im Modul (Prüfungsberechtigt) Hoppmann, Jörn (Module responsibility)
Prerequisites	
Skills to be acquired in this module	<p>The students should:</p> <ul style="list-style-type: none"> • know basic definitions, trends and application areas of digitalization • be able to assess the economic effects of digitalization • understand corporate strategies and business models in the context of digital transformation • know how companies should design processes and structures to promote digitalization in organizations • have an overview of social, legal and ethical aspects of digitalization • assess the environmental impact of digitalization • evaluate digital products, services and business models using ethical and sustainable guidelines • independently develop proposals for the integration of ethical, social and ecological criteria in digitalization projects and processes
Module contents	<p>The module "Digital Strategy and Sustainability" provides insights into the role digitalization for companies and the associated social discourse. The digital transformation leads to the emergence of new business models, markets and forms of interaction. This requires comprehensive changes in strategic orientation as well as in business processes and structures. In addition, new regulations and standards are required at the societal level in order to meet the ethical, ecological, and societal challenges posed by digitization.</p> <p>In the first part of the seminar, students are familiarized with the basics and application areas of digitalization as well as the economic, social, and ecological implications. Toward this end, important questions in the context of digital transformation will be raised and discussed drawing on company case studies. Exemplary questions that will be dealt with in this context are</p> <ul style="list-style-type: none"> • What are the technological drivers of digitalization and what trends can be observed? • What is the impact of digital transformation on industries and companies? • How can companies design strategies, business models, processes and structures to address the digital transformation? • What are the consequences of digitalization on a societal and legal level? • How does the digital transformation affect the natural environment? • How can social, ethical, and ecological aspects be integrated into digital products, services and business models? <p>In the second part of the course, students will develop digital business models in teams under the guidance of experienced coaches, taking into account economic, ecological and social/ethical criteria. The results are presented to the other students and company representatives and will be summarized in a term paper. An important part of the term paper is the critical reflection of current methods used to develop digital business models with regard to sustainability criteria.</p>

Zuständige Personen	<p>Böhringer, Christoph (Module responsibility)</p> <p>Lehrenden, Die im Modul (Prüfungsberechtigt)</p> <p>Riesenbeck, Lukas (Module counselling)</p>			
Prerequisites				
Skills to be acquired in this module	<p>This course aims at giving students an understanding of reasons, objectives and economic instruments for climate policy. Students first get acquainted with the natural science of the climate where anthropogenic greenhouse gas emissions constitute the source of man-made climate change. The latter is then explained from an economic perspective as a global environmental externality calling for environmental regulation to avoid substantial market failures. Game theoretic analysis of international negotiations and agreements provides key insights about the fundamental problems of free-riding and efficient climate policy design. Beyond theoretical propositions, 15 the lecture will critically discuss past and contemporary climate policies such as the Kyoto Protocol, the Paris Agreement, or the EU Emissions Trading System</p>			
Module contents	<p>atural science of climate change; environmental externalities and market failures; environmental regulation (emission taxes, standards, tradable permits, etc.); international environmental agreements; critical appraisal of climate policy implementation.</p>

Prerequisites	None			
Skills to be acquired in this module	Computer-based simulations play a key role for quantifying the economic impacts of policy reforms. Among numerical simulation methods, computable partial equilibrium (CPE) models are widely used in applied economic analysis. These models build on microeconomic theory for describing supply and demand behavior of economic agents on markets. Students will learn how to program such models and apply them to the impact assessment of trade, fiscal, or environmental policies.			
Module contents	In the course, we start from basic microeconomic theory to describe the supply-side and demand-side responses on economic markets triggered by regulatory policy measures such as taxes or subsidies. We then translate simple theoretical models into computable partial equilibrium (CPE) models and use empirical data for model parametrization. Subsequently, the CPE models are used to quantify the economic efficiency impacts and the economic incidence of policy instruments such as taxes, subsidies, standards or quotas. For the implementation of the simulation models on the students' PC we will learn a powerful state-of-the-art modeling language called GAMS (Generic Algebraic Modeling System) which initially had been developed for World Bank economists. The fundamental strength of GAMS lies in the ease with which algebraic models in economics and management (or other sciences) can be formulated and solved. Students enrolled to the course will receive a free GAMS license. For the examination, the students will be requested to adapt a basic market model towards a policy issue of their choice and provide a small written essay (max. 10 pages) on their applied analysis. For this, the students can team up in groups with 2 people and hand in their essay until the end of the summer semester.

Prerequisites				
Skills to be acquired in this module	<p>The students are able:</p> <ul style="list-style-type: none"> • to identify and discuss empirical challenges in research on developing countries • to understand, summarize, and discuss recent research studies in development economics • evaluate strategies to reach sustainable economic development discussed in the public and politics • participate in a discussion on the topic, developing a well-grounded position and problem solving strategy • to present current research to and discuss it verbally and in written form • to identify gaps in the literature on developing countries 			
Module contents	<p>The module introduces the students to the current challenges of developing countries and the strategies to overcome them. The module will focus on the empirical research on developing countries, addressing the reasons for the sluggish development as well as the applied approaches to foster economic development. In the lecture the empirical methods used in development economics will be discussed. In the seminar current research papers on topics like poverty, conflicts, foreign aid, health, human capital and institutions in developing countries will be discussed.</p>

wir911 - Advanced Topics of Sustainability Economics

Module label	Advanced Topics of Sustainability Economics			
Modulkürzel	wir911			
Credit points	6.0 KP			
Workload	180 h			
Verwendbarkeit des Moduls	<ul style="list-style-type: none"> kein Abschluss European Studies in Global Perspectives > Society, Economy and Politics Master's Programme Business Administration, Economics and Law (Master) > Schwerpunktmodule NM-VWL Master's Programme Business Administration, Economics and Law (Master) > Schwerpunkt "Volkswirtschaftslehre" (VWL) (MPO2020) Master's Programme Sustainability Economics and Management (Master) > Additional Modules 			
Zuständige Personen	<p>Böhringer, Christoph (Module responsibility)</p> <p>Siebenhüner, Bernd (Module responsibility)</p> <p>Lehrenden, Die im Modul (Prüfungsberechtigt)</p> <p>Riesenbeck, Lukas (Module counselling)</p>			
Prerequisites	none			
Skills to be acquired in this module	<p>This course aims at giving students an understanding of reasons, goals and instruments for climate policy, as well as implied complications due to the long term characteristics and the international dimension of climate change. Students first learn basics about the natural science of climate change and the main statements of climate research about the anthropogenic contribution to climate change. The economic interpretation of high pollution as a symptom of a market failure then leads to the treatment of policy instruments, and the understanding of economic efficiency as a prerequisite for effective climate policy. Game theoretic analysis of international negotiations and agreements provides key insights about the international dimension of the problem. By means of practical examples students then see in detail the functionality and pitfalls of selected implemented (or currently discussed) policies, e.g. the EU-ETS. With successful completion of the course, students shall be able to judge climate policy issues on an informed scientific basis (natural science and economics).</p>			
Module contents	<p>Natural science of climate change: greenhouse effect; measures, causes and impacts of climate change. Economics of climate change: market failures (public goods, externalities); game theory of international agreements (prisoner's dilemma, chicken game, assurance game, repeated games, continuous choice); environmental policy instruments (especially taxes, tradable permits). Climate policy in practice: EU-ETS (pitfalls: market segmentation, conditional grandfathering, lobbying); emission taxes and the EU-ETS; interaction between black and green quotas; embodied carbon tariffs.</p>

Prerequisites	Erfolgreiche Belegung des Moduls "Sustainable Supply Chain Management" (wir921)	
Skills to be acquired in this module	The module helps students to specialize in research in the field of sustainable supply chain management by developing their substantive and theoretical expertise and by augmenting their methodological expertise. Students hone their skills in gathering, reading, understanding, and synthesizing scholarly articles using different methods. They may also practice their data collection and data analysis skills. Moreover, students further develop their academic writing, reviewing, presentation, and discussion skills.	
Module contents	This masters-level module focuses on selected topics pertaining to the relationship perspective of sustainable supply chain management, comprising topics such as Stakeholder Management; Legitimacy, Decoupling & Greenwashing; Supply Chain Sustainability Risks; Sustainable Supplier Management; and Supply Chain Sustainability Dilemmas.	
Literatureempfehlungen	Selected scholarly research articles will be used throughout the module.

wir924 - Ecological Economics

Module label	Ecological Economics	
Modulkürzel	wir924	
Credit points	6.0 KP	
Workload	180 h	
Verwendbarkeit des Moduls	<ul style="list-style-type: none"> • Master's Programme Environmental Modelling (Master) > Mastermodule • Master's Programme Sustainability Economics and Management (Master) > Additional Modules 	
Zuständige Personen	<p>Sievers-Glotzbach, Stefanie (Module responsibility)</p> <p>Siebenhüner, Bernd (Module responsibility)</p> <p>Lehrenden, Die im Modul (Prüfungsberechtigt)</p> <p>Lehrenden, Die im Modul (Module counselling)</p>	
Prerequisites	None	
Skills to be acquired in this module	<p>The students:</p> <ul style="list-style-type: none"> get an overview of the current state of research in Ecological Economics know and understand core concepts and policy implications of Ecological Economics deepen their knowledge on one specific topic from the field of Ecological Economics improve skills in reading, interpreting and presenting academic journal papers 	
Module contents	<p>Ecological Economics is concerned with integrating the study and management of "nature's household" (ecology) and "humankind's household" (economics). This integration is central to many of humanity's current problems and to governing economic activity in a way that promotes human well-being, sustainability, and justice.

</p> <p>The aim of this module is to introduce students to core concepts and policy implications from the field of Ecological Economics. The module consists of two seminars.</p> <ul style="list-style-type: none"> Lecture/seminar "Ecological Economics": This lecture/seminar is structured into three parts. First, students are being introduced to the topic by two lectures on the specific vision and paradigms of Ecological Economics as distinguished from environmental & resource economics and on the history of Ecological Economics. Second, the students work out and discuss the core analytical concepts (such as entropy, ecosystem services, social-ecological resilience, substitutability of natural capital) as well as the core normative concepts (including distributive justice, human behavior) in Ecological Economics. Third, the students discuss and reflect certain policy implications following from Ecological Economics – specifically the measurement of welfare, economics of degrowth, governance of resources as commons, and social-ecological transformation. The basis for discussion will be classical and current scientific papers. Specialization seminar: Depending on current research foci and research projects of the Working Group of Ecological Economics, an additional seminar will give a deeper understanding of a specific research area in Ecological Economics (e.g., Social-Ecological Resilience, (De)Growth Concepts (Green Growth, Postgrowth, Degrowth), Commons).

Prerequisites	No	
Skills to be acquired in this module	<p>Methods of project management</p> <p>Introduction into the methods of qualitative empirical research</p> <p>Introduction into approaches to time management</p> <p>Identification of individual or team projects in sustainability management (case studies, empirical studies, marketing concepts)</p> <p>Self organized work on individual or team projects</p> <p>Mid-term and final presentation of project results</p>	
Module contents	<p>This module consists of two seminars (2 weekly contact hours per seminar) dealing with several topics from the broad field of sustainability, economics and management during term.</p> <p>The module's intention is to integrate current research activities of the University from the research areas of sustainability, economics and management into teaching activities. The Module provides students the possibility to actively participate in current research at Oldenburg University. The module's seminars each year deal with different projects and are thus designed each year by a different group of Oldenburg located researchers.</p> <p>This teaching concept provides the interface between theory and application of scientific theories into research practise. Thus, this module also introduces research work at universities in general.</p>

Zuständige Personen	<p>Busse, Christian (Module responsibility)</p> <p>Lehrenden, Die im Modul (Prüfungsberechtigt)</p> <p>Busse, Christian (Module counselling)</p>
Prerequisites	
Skills to be acquired in this module	<p>By focusing on sustainability from an intra-, and inter-organizational perspective, this module aims to equip students with an in-depth knowledge of the sustainability-related challenges and problems within supply chain management and suggests some tools for managing the same. It further seeks to capacitate students to understand and analyze the trade-offs and conflicts of targets within sustainable supply chain management. The content is closely linked to the latest research in the field, providing a theoretical understanding (within the lecture) while using real-world case examples (within the seminar) to develop a practical understanding simultaneously. Students will be able to connect theory with practice and get a taste of real-life corporate scenarios or lay a foundation for possible master theses. Further, working in groups will help students brush up their team management skills, and the final report shall accustom them to the intricacies of scientific writing.</p>
Module contents	<p>This masters-level module focuses on how firms could practically manage sustainability in its supply chains. Two broader perspectives, as detailed below, guide the coursework:</p> <p>1) The material flow perspective approaches SSCM with sustainably managing physical flows and processes within a firm's operations and upstream (and downstream) supply chain links. Individual (lecture) sessions are built around the following topics: Introduction to Sustainability and Supply Chain Management; Introduction to Sustainable Supply Chain Management; Sustainable Product Development & Lean and Green; Workplace Health and Safety; Sustainable Transportation; Sustainable Warehousing & Sustainable Packaging; and Closed-Loop Supply Chain Management</p> <p>2) The relationship perspective further adopts a more direct managerial viewpoint on inter-firm relations. Individual (lecture) sessions discuss the following topics: Stakeholder Management; Legitimacy, Decoupling & Greenwashing; Supply Chain Sustainability Risks; Sustainable Supplier Management; and Supply Chain Sustainability Dilemmas</p> <p>Some of the theoretical perspectives discussed within the lecture sessions will be prepared by case studies of well-known companies such as Walmart, DHL, HP, Volkswagen, Lidl, and Apple.</p>
Literatureempfehlungen	<p>The lecture content has been developed from various research publications, rather than a textbook. Students are encouraged to read some of the original publications as amendments to the lecture. The case studies will mostly be based on professionally written cases. Scholarly publications/articles, as well as the case study documents, will be provided and discussed throughout the sessions.</p>

Zuständige Personen	<p>Hoppmann, Jörn (Module responsibility)</p> <p>Lehrenden, Die im Modul (Prüfungsberechtigt)</p> <p>Hoppmann, Jörn (Module counselling)</p>
Prerequisites	
Skills to be acquired in this module	<p>The students should...</p> <ul style="list-style-type: none"> • know and understand basic concepts, instruments and theories in the context of corporate sustainability and corporate social responsibility • be able to apply conceptual frameworks to analyze and critically question the sustainability of companies • develop options to improve the sustainability of companies and derive recommendations for their implementation in practice
Module contents	<p>The module "Strategic Sustainability Management" provides an overview of the debates on the role of firms for sustainable development from a strategic perspective. The first session will briefly introduce the historical debate on Corporate Sustainability and Corporate Social Responsibility and delineate important concepts. The following sessions will use concrete company case studies as a basis for a critical discussion of questions in the context of corporate sustainability that are of strategic importance for firms. Questions that will be discussed are, amongst others:</p> <ul style="list-style-type: none"> • How can one determine whether a firm acts in a socially and ecologically sustainable way? • Which factors drive and hinder the diffusion of socially and ecologically superior solutions and companies in the market? • To which extent is there a conflict between firm and market growth on the one hand and sustainability on the other hand? • Which possibilities does a company have to deal with conflicts between social/ecological and economic goals? • How can existing firms and value chains be transformed toward sustainability? • What is the role of managers and boards of directors for organizational change toward sustainability? • How does the ownership and financial structure of firms influence their strategy toward sustainability? • In how far can cooperation and partnerships between organizations help integrate social and ecological aspects in 53 firms? <p>In addition to discussing these questions by drawing on company case studies, students will be introduced to the corresponding theoretical concepts and frameworks in the academic literature. Also, students will be given the opportunity to test different strategies for implementing sustainability in organizations during a simulation, which allows them to gain first-hand insights into the emerging challenges. Toward the end of the course, students will apply and deepen the knowledge they have gathered over the semester by writing a seminar thesis.</p>
