Klima, Mensch und Energie

# Climate, Humans, Energy

October 07-09, 2026

Carl von Ossietzky Universität Oldenburg

## Overview

With the Oldenburg Climate Symposium, actors from science, industry and society meet in a biennial interactive format to discuss topics in the field of climate change. We focus on the role of the human, and put a changing focus on specific areas. In 2024, the focus has been on marine areas with the topic "Climate, Humans, Ocean".

The next edition of the Oldenburg Climate Symposium focusses on energy transitions with the topic "Climate, Humans, Energy". The conference aims to bring together research and society to exchange insights and to create a roadmap on possible trends for socio-technical energy transitions.

## Preliminary program

Wednesday, October 07, 2026

Public lecture with **Professor Claudia Kemfert** (Leuphana Universität Lüneburg)  
Venue: CORE Oldenburg – in the evening.

Thursday, October 08, 2026

Scientific symposium (clusters: digitalized energy systems, society and law, policy, and technological challenges of future energy systems) and poster session.

### Speakers

**Professor Anke Weidlich** (Universität Freiburg)

**Professor Johan Lilliestam** (FAU Erlangen-Nürnberg)

**Assistant Professor Christina Papadimitriou** (TU/e)

**Professor Sebastian Lehnhoff** (Universität Oldenburg)

**Assistant Professor Jesse Hoffman** (Utrecht University)

**Associate Professor Christian Zuidema** (RUG)

**Professor Martha Roggenkamp** (formerly RUG)

### Poster session

Interested in sharing your research on energy transitions? Join our poster session and discuss your ideas and findings with the interdisciplinary scientific community. More information will follow shortly.

Friday, October 09, 2026

Interactive workshops on transfer and discussion with political stakeholders.

## Registration

Participation will be free of charge. Anyone who is interested is welcome.  
Details regarding the registration will follow soon.
