Property Theory compared: A European perspective

Sustainability transforms property. - Nachhaltigkeit verändert Eigentum. - Duurzaamheid verandert eigendom.

23/24 November 2023

Venue: Carl von Ossietzky University of Oldenburg - Senate Hall

Organisers: Prof. Dr. Christine Godt (UOL) and Prof. Dr. Björn Hoops (RUG-UniTo)

Sustainability transforms property. The challenges of sustainability also concern property, and transform the public discourse around it. Yet, while the institution and the challenge are global, the public discourse differs according to national preferences and cultural premises. Striking differences become recently apparent when the adaptation of private heating systems was discussed in 2023. We take the Dutch-German differences as a spring board for an analysis of property discourses in Europe: How does the institution of property change?

Programme

Thursday, 23 Nov. 2023

9.30-12.30h Foundations of Property (Chair: Peter Rott)
