ABSTRACT

What does the term trans mean? What's the difference between trans* and inter*? Is every non binary individual also considered trans*? And how does gender diversity impact ones academic career? We will tackle this complex topic in two parts.

The first part will be a short overview of gender and sex in general, the terminology, differences and similarities of trans*, inter* and non binary individuals. We will also address issues related to discrimination and dispel common myths.

In the second part we will introduce various ways to support TIN* individuals and highlight further resources. During this presentation the focus will remain on TIN* experiences within academia.

Afterwards there will be a Q&A session.

This lecture is part of the lecture and workshop series:

Gender and Diversity in STEM & Medicine

hosted by equal opportunities officers of Faculty V and VI
