

Institut für Chemie

Anorganisch Chemisches Kolloquien

Wintersemester 2021/22

**Die Vorträge finden statt im Großen Hörsaal W3-1-161,
17.00 Uhr c. t.**

Datum	Kolloquium
02.12.2021	Dr. Claudia Bizzarri, KIT Karlsruhe „Earth-abundant metal complexes. From photo(redox)catalysis to bioimaging“
09.12.2021	Dr. Catherine Weetman University Strathclyde, Glasgow “Small Molecule Activation with low-oxidation state main group compounds”
20.01.2022	Dr. Agnieszka Nowak-Król, Uni Würzburg „Helically chiral compounds containing boron and other main group elements. Towards novel π -conjugated materials“
27.01.2022	Dr. Johanna Heine, Uni Marburg "On the road to new materials with main group halogenido metalates"
