

Geochemisches Seminar ICBM WiSe2014/2015

Dienstags 16:15-17:45 Uhr, Seminarraum W15-1-146

28.10.2015

Vanessa-Nina Roth (Marine Geochemie)

“Ecosystem-specific molecules in dissolved organic matter as fundament for new marker compounds”

11.11.2015

Anika Pohlabein (Marine Geochemie)

“Structural analysis of dissolved organic sulfur – comparison of oxic and anoxic environments”

09.12.2014

Beatriz Elisabeth Noriega Ortega (Marine Geochemie)

“First insights into the exometabolome of the Roseobacter clade”

Sebastian Jung (Marine Geochemie)

“Attempt of the optimization of UPLC-based procedure for the preparation of the age determination of marine black carbon”

06.01.2015

Carsten Simon (Marine Geochemie)

“Riverine mixing at the molecular scale – A process study on the fate of DOM and selected metals (Fe, Cu) in the Amazon confluence zone (Manaus, Brazil)”

Claudia Ehlert (Marine Isotopen-Geochemie)

“Transformation of silicon in a coastal sandy beach ecosystem: insights from stable silicon isotopes in ground- and porewaters”

20.01.2014

Maren Zark (Marine Geochemie)

“Effects of ocean acidification on formation and turnover of DOM in a Swedish fjord”

Lena Pannbacker (Mikrobiogeochemie)

“tba”

03.02.2014

Ronja Paffrath (Marine Isotopen-Geochemie und Mikrobiogeochemie)

“Trace elements in porewaters from Spiekeroog island”

Helena Osterholz (Marine Geochemie)

“Terrigenous input and microbial processing – driving forces DOM composition in the North Sea”
