

Geochemical Seminar ICBM (WS 2018/2019)

Tuesday 4:15-5:45 pm - W15-1-146

- 16.10.2018**
16:45 h
Anja Reckhardt (Microbiogeochemistry)
Cycling of redox-sensitive metals (U, Mo, V, Tl) in a barrier island fresh groundwater lens
- 30.10.2018**
Jennifer Hoppe (Marine Geochemistry)
Photodegradation products of beta-carotene as possible components of deep sea dissolved organic matter
- 13.11.2018**
Simone Heyen (Organic Geochemistry)
Analysis of organic acids in the exometabolome of a denitrifying bacterium
- 27.11.2018**
Christopher Dibke (Organic Geochemistry)
TBA
Melina Knoke (Marine Geochemistry)
TBA
- 11.12.2018**
Corinna Mori (Microbiogeochemistry)
Non-conservative behavior of molybdenum and thallium induced by a phytoplankton summer bloom?
- 08.01.2019**
Melanie Behrens (Marine Isotope Geochemistry)
Insights into rare earth element sources, input, and zonal transport in the tropical West Pacific
- 22.01.2019**
Maurits Halbach (Organic Geochemistry)
TBA
Philipp Böning (Marine Isotope Geochemistry)
Iron cycling in the Benguela upwelling system
