

Seminar announcement

Find out about
career paths of marine &
climate scientists!
What is their current job like?
How did they get it?
Which skills do they need?

Career Insights Online: "Science Management for Research Vessels"

for young researchers enrolled in PhD programmes and postdocs at the
marine institutes in Bremen, Bremerhaven and Oldenburg

with: **Dr. Greta Giljan**

After completing her PhD in Marine Microbiology in 2020, Greta moved from doing science to enabling science. At the Helmholtz Association, she has since worked as a science manager at the interface of research, strategy, and coordination — first supporting Young Investigator Group Leaders in their early career phase, and now managing the Review Panel Research Vessels. In this role, she supports the review of scientific projects for the German research fleet and coordinates closely with the DFG, ship coordinators, and funding bodies.

Date & time: June 19, 2026 at 14:00 - 15:00

Format: online meeting via Zoom or Webex

Language: English

Participants: maximum of 50

Target group: Early career scientists who are interested in broadening their horizon and getting new ideas for their own future career development.

Registration: [HiFis Indico Platform](#)

The seminar format **Career Insights Online** aims at introducing different job perspectives for marine and climate scientists in the widest sense and offers the possibility to get in touch with former members of the Marine Graduate Schools in Oldenburg, Bremen and Bremerhaven. It focusses on career paths outside of academia and will give insights into job fields in, e. g. industry, (public) administration, consulting, and journalism. Speakers are asked to talk about their current position, the interdisciplinary skills they achieved during their doctorate, the career steps they took, as well as about work-family-life-balance. After their presentation, participants will have the opportunity to ask questions to the speakers.
