

ICBM-PhD-Colloquium

Summer term 2015 / winter term 2015/16

- 20.04. Establishment of 2D Blue native-/SDS-PAGE for analysis of membrane protein complexes in the marine sulfate reducer *Desulfobacula toluolica* Tol2
H. Ruppertsberg
11. 05. Identification of the threshold concentration for the degradation of 4-hydroxyacetophenone by "Aromatoleum aromaticum" strain EbN1
M. Kant
Defining the unknown Roseobacters in marine sediments
M. Pohlner
- 19.10. Influence of Quorum Sensing and Antibiotics on the Bacterial Way of Life of *Phaeobacter* spp.
P. Beyersmann
- 30.11. *Leptastrea purpurea* a possible model organism to coral research
S. Nietzer
The Effect of Sedimentation on the survival of scleractinian coral recruits: The first month is crucial
M. Möller
- 18.01.16 Low wind speed induces bacterial community changes in the seasurface microlayer of a wind wave system
J. Rahlff
