16:00 – 17:00 meeting of all participants of the planktotronexperiment

During the seminars we will discuss general EcoMol issues, and have two PhD students present the progress of their work. The seminar will be entirely organized by the PhD students (the respective organizers are named on the list). All PhD students and the PIs or scientists from each project should be present.

As we discussed on our seminar on February 22nd we would like to encourage PhD presentations e.g. in geochemical seminars to get a diverse audience and feedback for your topics. All attendant EcoMol members on February 22nd decide to open the EcoMol Seminar for a presentation with the topic preparation and test talk for a “**Thesis committee meeting**”. Every doctoral candidate has to have at least two thesis committee meetings per year. In our EcoMol Seminar we will give you the chance to present shortly your topics, questions to the other PhDs to get some feedback.
