

# Newsletter 01/2022

for lecturers in the Master of Marine Environmental Sciences

## Not new, but important: Deadlines for evaluating exams

The assessment must be made within five weeks for module examinations or eight weeks for a Master's thesis and forwarded to the examination office.

Source: §13(1) General part of the examination regulations  
[https://uol.de/studium/studiengang/pruefungen?id\\_studg=210](https://uol.de/studium/studiengang/pruefungen?id_studg=210)

## Container module

The module

### Current Topics and Methods in Marine Environmental Sciences

will be available from WS2022/2023 on.

In the module, lecturers can offer 3 CP or 6 CP courses. No change in the examination regulations is necessary for this, so that current topics can be offered at short notice.

Possible forms of events: Lecture, seminar, exercise, internship, colloquium

Possible forms of examination: presentation, homework, oral examination, practical exercise, written exam

## Teaching load credit in mar420 Environmental Science Research Project (UfP)

The supervision of students can be taken into account in the future. 0.5 LVS are recognized per supervised student, a maximum of 2 LVS can be recognized per lecturer for the course „5.08.421 Environmental Science Research Project“ in the teaching hours report in StudIP if the students are entered there as participants.

## Job advertisements for master's students in marine environmental sciences

There is now a section on the course website of the degree program where internal and external job offers that are of interest to master's students in marine environmental sciences can be linked. If necessary, please send the link to [kohlmeier@icbm.de](mailto:kohlmeier@icbm.de).

## Avoiding block courses overlapping

With the next request for the course offer, there will be a table accessible to all in which the dates of the block courses can be entered. We hope to avoid overlapping at this early stage.
