uol.de/en/application/international-students/master

Application deadlines

uol.de/en/students/application/deadline

Language requirements

Proof of adequate language skills must be provided before starting the degree programme:

uol.de/en/application/international-students/language-requirements

Founded in 1973, the University of Oldenburg is one of the youngest universities in Germany. It is named after Nobel Peace Prize laureate Carl von Ossietzky, who was one of the most prominent journalists of the Weimar Republic.

A look into the future

How is climate change changing our lives? What will the hearing aid of the future be able to do? How do animals find their way? How will we share new knowledge? The University of Oldenburg offers study programmes and conducts research in many promising fields, from energy, hearing and educational research to medicine, marine biology and the social sciences. Interdisciplinary, international, responsible. And always open to new approaches.

Campus university with a community feel

With around 15,000 students enrolled in over 100 degree programmes, they are the beating heart of the University. Students are introduced to science and their future careers at an early stage. The University has successfully created an attractive learning environment by introducing various teaching formats, establishing good student-teacher ratios and designing a compact campus.

Open to new approaches

Want to start your own company? The University of Oldenburg is among the best universities in Germany for budding entrepreneurs. Since its opening in 2012, our Founding and Innovation Center (GIZ) has supported over 450 start-up projects from various academic disciplines.

INSTEP Initiation phase for international students

In addition to the German Language University Entrance Examination (DSH), INSTEP offers other useful services to help international students get off to a good start. These services are also open to students in English-language Master's programmes and to refugees.
