MTEL Scientific Director

Prof. Dr. Olaf Zawacki-Richter

A professor of educational technology at the University of Oldenburg.

“Comprised of international experts with extensive research backgrounds and experience on professional development, our international faculty and your guide as you apply what you have learned from the research to your everyday practice. As a student in the MTEL programme, you will be able to build your network of professional contacts, while gaining the necessary skills and competences for realizing technology-supported education offerings for your organization.”

Degree
Master of Arts (MA) in Management of Technology-Enhanced Learning with 120 credit points, awarded by the University of Oldenburg

Teaching language
English

Beginning
March and September

Course delivery and length
Fully online programme, 10-week course modules

Course offerings
13 course modules

Time investment
10 hours per week

Prior learning assessment and recognition (PLAR)
Professional competences acquired in practice, training, and other continuing education forms, as well as academic credits or degrees can be applied toward credit, resulting in a shorter study period.

Programme duration
5 semesters for master's programme
1 semester for certificate

Application deadline
Winter Semester: 1 May to 1 August
Summer Semester: 1 November to 1 February

Entry requirements
• Bachelor's degree or equivalent degree of at least 210 credit points
• At least one year of professional experience
• English language competence at C1 level or English as native language

Fee
50% off all course modules

Semester fee: 171.82 €
1.500 € for master's module

Benefits of online learning:
• Access to the classroom anytime and anywhere with flexible study options
• Engage in real-world examples in applying new knowledge to practical contexts
• Exercise freedom of choice in realising learning goals and objectives
• Study in small groups while receiving personalised support and guidance

Continuing Education Master’s Programme

Management of Technology-Enhanced Learning (MA)

What you learn today, you can apply tomorrow

For managers, instructors, and support professionals in higher education environments

Gain the necessary knowledge and professional skills and competences for strategising and organising for technology integration and transformation within all processes and components of your organisation and across the student life cycle.

• Learn from an international network of research experts and practitioners in the field
• Access the classroom anytime and anywhere with flexible and mobile learning
• Engage in real-world examples in applying new knowledge to practical contexts
• Exercise freedom of choice in realising learning goals and objectives
• Study in small groups while receiving personalised support and guidance

**Continuing Education Master’s Programme**

**Management of Technology Enhanced Learning (MA)**

**What you learn today, you can apply tomorrow**

**For managers, instructors, and support professionals in higher education environments**

Gain the necessary knowledge and professional skills and competences for strategising and organising for technology integration and transformation within all processes and components of your organisation and across the student life cycle.

---

**Carl von Ossietzky University of Oldenburg**

“Comprised of international experts with extensive research backdrops and experiences on professional planning, our international leaders and your guidance as you apply what you have learned from the research to your everyday practice. As a student in the MTEL programme, you will be able to further your network of professional contacts, while gaining the necessary skills and competences for realising technology-supported educational offerings for your organisation.”

---

**Carl von Ossietzky University of Oldenburg**

Located in north-west Germany, the University of Oldenburg is Germany’s first university to be founded by state decree, in 1973. The University of Oldenburg offers further education for the new century. Today, over 16,000 students from a wide range of academic and non-academic fields are taking advantage of the diverse educational opportunities at the university. In addition to the Faculty of Engineering, the Faculty of Science, and the Faculty of Business Administration, the University of Oldenburg offers a range of specialties in the humanities, social sciences, and political sciences.

**The Center for Lifelong Learning (C3L)**

The Center for Lifelong Learning (C3L) is a research center at the University of Oldenburg. The C3L leads the development and application of credit transfer procedures. The courses are designed to meet the needs of funding agencies, companies, and public institutions. The C3L is committed to a comprehensive support system that includes 50% off all course modules, special discounts, and the availability of institutional representatives. The C3L employs more than 70 educational development, research, and leadership staff to support the needs of businesses and public institutions. The C3L is a leader in Germany’s continuing higher education sector through the development of innovative teaching and learning formats and in the development and application of credit transfer procedures. The courses are designed to meet the needs of funding agencies, companies, and public institutions. The C3L is committed to a comprehensive support system that includes 50% off all course modules, special discounts, and the availability of institutional representatives.
Flexible learning for working adults

The fully online MTEL master's programme is organised into required and elective components. Six course modules are required for the master's, and six course modules are elective, giving you flexibility in choosing your area of professional focus. One prerequisite course serves as the starting point for the programme: Principles, Theory, and Practice of Technology Enhanced Learning (TEL). This course establishes theoretical foundations in the disciplinary history, theory, and principles of ODL and TEL.

Example study plan

The MTEL programme gives you the flexibility to define your learning journey: you define which course modules you will take, how many you take each semester, as well as when you take them. The following plan is an example of how you could complete the MTEL in five semesters.

### 1. Semester

- Proerequisite course: Principles, Theory, and Practice of TEL
- MTEL100 Strategic Management and Educational Leadership in TEL
- MTEL115 Design of TEL Environments
- MTEL120 Costs and Economics of TEL
- MTEL125 International and Transnational Education Issues in TEL
- MTEL200 Strategic Management and Educational Leadership in TEL

### 2. Semester

- Learner Support in TEL
- MTEL220 Change Management and Innovation in TEL
- MTEL225 Quality Management of TEL
- MTEL230 Student Life Cycle Management for TEL
- MTEL240 Advanced Issues in TEL

### 3. Semester

- 5 Required courses + 1 Elective course
- MTEL220 Change Management and Innovation in TEL

### 4. Semester

- 2 Required courses + 3 Elective courses
- MTEL225 Quality Management of TEL
- MTEL230 Student Life Cycle Management for TEL
- MTEL240 Advanced Issues in TEL

### 5. Semester

- 2 Required courses + 3 Elective courses
- MTEL225 Quality Management of TEL
- MTEL230 Student Life Cycle Management for TEL
- MTEL240 Advanced Issues in TEL

### Fees

* Special 10% Discount on course modules when you register for all five semesters.

In addition, you can also reduce programme fees by applying for prior learning assessment and recognition of prior learning.

For additional information, see [mtel.unisa.de/certificates](http://mtel.unisa.de/certificates).

Certificates of advanced studies (CAS)

The MTEL programme is divided into two categories: the MTEL master's programme and the MTEL certificates of advanced studies (CAS).

### Master's Degree

- Management of Technology Enhanced Learning (MTEL)

### Certificates of Advanced Studies (CAS)

- MTEL certificates of advanced studies (CAS)

Reasons for continuing education can be quite different for everyone. Whether you are considering short-term postgraduate training as an introduction to your field or an interest in a more extensive study, you will find that the MTEL programme offers educational opportunities to meet your needs.

With the MTEL programme, you choose the duration and content of your studies, as well as your desired area of professional emphasis according to your personal qualification goals. You can choose to participate in the complete MTEL programme or to continue your studies on the basis of certificates of advanced studies (CAS).
Programme content

The fully online, international Master of Technology Enhanced Learning (MTL) programme has been designed specifically for working adults who want to complete their degree without interrupting their careers and who wish to enhance their professional skills and competences in making technology enhanced learning (TEL) in the classroom. Based on a systems view of education, the MTEL programme will prepare you to strategise and organise for the delivery and evaluation. With its focus on digital transformation across the organisation, the MTEL programme is suitable for all levels of management and professional work. The programme enables you to apply and deepen your skills and competencies in realising technology enhanced learning in your work and organisational context.

Flexible learning for working adults

The fully online MTEL master’s programme is organised into required and elective components. Six course modules are required for the MTEL degree, and six course modules are elective, giving you flexibility in choosing your area of professional focus. One prerequisite course serves as the starting point for the programme: MTEL100 Principles, Theory, and Practice of Technology Enhanced Learning (TEL). This course establishes theoretical foundations in the disciplinary history, theory, and principles of TEL and ODL.

Example study plan

The MTEL programme gives you the flexibility to define your learning journey: you decide which course modules you will take, how many you take each semester, as well as when you take them. The following plan is an example of how you could complete the MTEL master’s in five semesters:

<table>
<thead>
<tr>

Fees

Programme fees for the MTEL programme are tiered to accommodate a variety of student needs. The following table outlines tiered fees per course module: 12 course modules (nine elective modules and three required modules) and a master’s thesis. All fees are charged in South African Rand (ZAR). Modules are classified as “Elective” or “Required” based on the student’s area of professional focus. The table also includes a “Specialised TEL Discount” for students who have completed a TEL-related course in the last two years.

The knowledge and skills Unisa staff gain from studying at the Carl von Ossietzky University of Oldenburg are aligned with Unisa’s goal towards becoming the leading ODL research and innovation hub. The courses are perfect examples of modelling quality, flexibility and technology-enhanced teaching and learning support. This will enable Unisa to produce graduates who will be in demand in the local, continental and global contexts.

To learn more about our CAS programmes, see: uol.de/mtel/certificates

100% Credit Transfer is available for CAS programmes.
The fully online, international Management of Technology Enhanced Learning (MTEL) graduate programme has been designed specifically for working adults who want to complete their degree without interrupting their careers and who want to enhance their professional skills and competencies in making technology enhanced learning (TEL) in the classroom. Based on a systems view of education, the MTEL programme will prepare you to strategise and organise for technology integration and transformation within all components of the educational system. The programme, administration, teaching and learning, research, IT, human resources, and management across the student life cycle from curriculum planning and development to course delivery and evaluation. With its focus on digital transformation across the organisation, the programme is suitable for all levels of management and prospective management who want to implement technology enhanced learning.

Your MTEL journey will begin with a prerequisite course that gives you the theoretical foundations in the discipline history, theory, and principles of online and distance learning (ODL). The prerequisite course serves as the starting point for the programme. Once you have successfully completed the prerequisite course module, you can choose from the five remaining required courses, which can be taken as per your need. At the end of the programme, you will complete a master’s thesis.

Elective modules allow you to specialise in a specific area, for example, leadership and management, instructional design, and learner support. The MTEL programme includes nine elective modules, from which you can choose six electives. You decide the order in which you will take the elective courses.

All courses are taught using CAS online learning management system (CAS), thus ensuring full flexibility and accessibility to course materials, as well as fellow students and the instructional team. Courses are also available on mobile devices, using the CAS app to download the free CAS app for Android or iOS.

The programme has been designed to be fully online, and you have the flexibility to participate in an online master’s colloquium with other students who are in the process of finishing the degree.

In addition, you can also reduce programme fees by applying for prior learning assessment and recognition of previous credits.

For further information, see [www.c3llo.co.za](http://www.c3llo.co.za)

**Individual continuing education offerings**

Reasons for continuing education can be quite different for everyone. Whether you are considering short-term postgraduate training as a stepping stone to a new job or as an extension to your professional development, you can choose to participate in the complete MTEL programme or to continue your education on the basis of certificates of advanced studies (CAS).

The fully online MTEL master’s programme prepares you to lead and manage in technology enhanced learning (TEL) environments. Whether you are considering short-term postgraduate training as a stepping stone to a new job or as an extension to your professional development, you can choose to participate in the complete MTEL programme or to continue your education on the basis of certificates of advanced studies (CAS).

**Certificates in advanced studies**

If you are interested in short-term learning, the MTEL programme offers courses toward certification in specific professional areas. When electing for a certificate of advanced studies (CAS), you will be enrolled as a guest student while in the certificate programme. If you choose to challenge the MTEL programme at a later date, you have already taken will be credited toward the degree.

**MTEL certificates of advanced studies**
