Contents

Vorwort / Foreword **5**

Introduction **7**

1 Self-Regulated Learning: Theoretical Background **9**
1.1 Self-Regulation, Self-Management, and Self-Regulated Learning 9
1.2 Self-Regulated Learning as a Complex Phenomenon 11
1.3 Different Models of Self-Regulated Learning 12
1.3.1 Cognitive Constructivist Framework 12
1.3.2 Social Cognitive Theory 12
1.3.3 Volitional Views 13
1.3.4 Vygotskian Approaches 13
1.3.5 Information-Processing Views 14
1.4 Consensual Definition of Self-Regulated Learning 14
1.5 Self-Regulated Learning and Strategic Action 15
1.6 Self-Regulated Learning and Motivation/ Volition 16
1.7 Self-Regulated Learning and Goal Orientation 18
1.8 Self-Regulated Learning and Metacognition 20
1.9 Phases and Areas of Self-Regulated Learning 22
1.10 Awareness of Self-Regulated Learning and Metacognition 22
1.11 Conclusion 24
1.11.1 Self-Regulated Learning and Instruction 24
1.11.2 Is Self-Regulated Learning Successful Learning? 24
1.11.3 Self-Regulation and/ or Co-Regulation 25
1.11.4 Working Definition for This Study 25

2 Measurement and Assessment of Self-Regulated Learning **26**
2.1 Questionnaires 26
2.2 Learning Diaries 28
2.3 Interviews 28
2.3.1 Structured and Semi-Structured Interviews 29
2.3.2 Think-Aloud Measures 29
2.3.3 Stimulated Recall Interviews 30
2.4 Observation 30
2.5 Other Methods 31
2.5.1 Teacher Judgements 31
2.5.2 Trace Methodologies 32
2.5.3 Error Detection Tasks 32
2.6 Training Studies 32
2.7 Multi-Method Designs 32
2.8 Summary 33

3 Developmental Aspects of Children's Self-Regulated Learning 34
3.1 Development of Self-Regulated Learning in Different Models 34
3.2 Cognitive Development and Self-Regulated Learning 35
3.2.1 Development of a "Theory of Mind" 36
3.2.2 Further Development 39
3.3 Classroom Context and the Development of Self-Regulated Learning 42
3.4 Summary 43

4 Methods and Methodological Reflections 44
4.1 Overview 44
4.2 General Methodological Approach 46
4.2.1 Grounded Theory Methodology 46
4.2.2 Participation as a Basic Principle 47
4.2.3 Qualitative Triangulation 47
4.2.4 Children's Perspective 48
4.3 Data Collection 48
4.3.1 Permissions and Organisational Aspects 49
4.3.2 Participant Observation 49
4.3.3 Video Observation 51
4.3.4 Interviews 54
4.3.5 Triangulation of Different Perspectives in Data Collection 56
4.3.6 Theoretical Sampling 56
4.4 Data Preparation 58
4.4.1 Selection of Video Sequences for Analysis 58
4.4.2 General Transcription Procedures 59
4.4.3 Transcription of Video Data 59
4.4.4 Transcription of Interviews 61
4.5 Data Analysis 61
4.5.1 Analysis in Grounded Theory 61
4.5.2 Process of Analysis in This Study 64
4.6 Methodological Foundation and Quality Criteria 67
4.6.1 Evaluative Criteria for Grounded Theory 67
4.6.2 The Phenomenon and the Chosen Methods and Methodology 68
4.6.3 Adequacy of Methods With Regard to the Children 70
4.6.4 Discussing Research in a Team 70
4.6.5 Limitation or Scope of the Study 71

5 Young Children and Self-Regulated Learning – Three Examples 72
5.1 The Classroom Context – Some General Remarks 72
5.1.1 The Room and the Teacher(s) 73
5.1.2 The Tasks – Freedom of Choice 73
5.2 Three Examples from Video Observation 74
5.2.1 Situation 1: "I am building a huge pyramid!" 75
5.2.2 Situation 2: "We've got to step on it" 82
5.2.3 Situation 3: Hanna – a Silent Student Doing Individual Work 87
5.3 Conclusion 89

6 Fundamental Aspects of Young Children's Self-Regulated Learning 90
6.1 Children's Metacognitive Knowledge 90
6.1.1 Interview vs. Observational Data on Metacognition 91
6.1.2 Knowledge About Task-Parameters 92
6.1.3 Knowledge About Self-Parameters 94
6.1.4 Knowledge About Strategies 94
6.1.5 Complex Metacognitive Knowledge 94
6.1.6 Summary 95
6.2 Children's Conception of Learning 95
6.2.1 Data on Children's Conception of Learning 96
6.2.2 What Do Children Think About School? 96
6.2.3 What Do Children Think About Learning? 97
6.2.4 Summary 99
6.3 Children Pursue Goals 99
6.3.1 Goals in Data 100
6.3.2 Criteria for Evaluation 101
6.3.3 Goals in the Classroom 103
6.3.4 Summary 110
6.4 Children Monitor their Learning 111
6.4.1 Monitoring in Data 112
6.4.2 What to Monitor 113
6.4.3 When to Monitor 113
6.4.4 Strategies for Monitoring 114
6.4.5 Summary 117
6.5 Children Act Strategically 118
6.5.1 Strategies in Data 118
6.5.2 Strategies for Orientation 119
6.5.3 Academic Help-Seeking 120
6.5.4 Cheating and Shortcuts 123
6.5.5 Motivational Strategies 124
6.5.6 Summary 125

7 Chronological Sequence of Self-Regulated Learning 127
7.1 Phases and Areas of SRL 127
7.1.1 Phase 1: Forethought, Planning and Activation 128
7.1.2 Phase 2: Monitoring 130
7.1.3 Phase 3: Regulation and Control 132
7.1.4 Phase 4: Reaction and Reflection 133
7.2 Complex Self-Regulation: Representation of This Model 134
7.2.1 First Example: Reflection in an Interview 135
7.2.2 Second Example: Cooperative Planning and Anticipation 136
7.2.3 Third Example: Monitoring of Methods 137
7.2.4 Fourth Example: Self-Evaluation 137
7.3 Reflections About Pintrich's Model 138
7.3.1 Separation and Distinction of Phases and Areas 138
7.3.2 The (Social) Context 140

7.3.3 Cognitive Processes and What Else? ... 140

8 Conclusion and Outlook ... 142
8.1 Conclusion: Young Children's Self-Regulated Learning ... 142
8.1.1 Metacognition in Young Children's Self-Regulated Learning ... 142
8.1.2 Goal Setting as a Crucial Step in Self-Regulated Learning ... 143
8.1.3 Self-Regulated Learning and Academic Effectiveness ... 144
8.2 Outlook: Fostering Self-Regulated Learning ... 145
8.2.1 Some General Principles ... 145
8.2.2 General Principles in Light of the Study ... 146
8.2.3 Fostering Children's Reflections ... 147
8.2.4 Appraising Difficult Tasks ... 147
8.2.5 Encouraging Mastery Goals and Qualitative Criteria ... 148
8.2.6 Fostering Teacher's Perception and Awareness ... 148
