

Research Group **Animal Physiology and Behaviour**

- Name: Prof. Dr. Georg Klump
- Main research areas: auditory perception, ecology and evolution of communication
- Interested in: processing mechanisms on different levels of the auditory pathway, age-related auditory processing deficits, auditory scene analysis, comparative studies of hearing, evolution of signalling
- Expertise: animal psychophysics, operant conditioning, startle, recording neuronal responses, bioacoustics, behavioural ecology
- looking for expertise in: anatomy, functional imaging
- E-Mail: georg.klump@uol.de
