

Addition to the safety concept September 2020.

- The distance between the persons must be as large as possible and the time of the joint interaction must be as short as possible (if you want to chat while waiting during a scan- please just go outside!)
- Working together in the Core Facility should be an exception, e.g. for training purposes, problem solving and urgent scientific exchange about the material to be microscoped.
- If there is more than one person in the Core Facility Fluorescence Microscopy W4-0-081, both persons **MUST** wear masks.
- The number of persons who may be in W4-0-081 at the same time is limited to two persons.
- These persons, who work in W4-0-081 at the same time, should belong to the same shift of a working group.
- If two persons sat together at the same microscope, both persons document in the Core Facility when and how long they sat together (**BOTH** Names in the SP8 or SP5 book!)
