

Geochemical Seminar ICBM (SS 2017)

Tuesday 4:15-5:45 pm - W15-1-146

- 11.04.2017** **Claudia Ehlert** (Marine Isotope Geochemistry)
Stable Si isotope signatures of marine pore waters – Biogenic opal dissolution versus authigenic clay mineral formation
- 25.04.2017** **Matthias Rehbein** (Marine Isotope Geochemistry)
Rare earth elements in the South Pacific Subtropical Gyre (master thesis)
Teresa Catalá (Marine Geochemistry)
Malaspina expedition
- 16.05.2017** **Lea Oeljeschläger** (Marine Geochemistry)
Dissolved organic matter in the surface microlayer (master thesis)
- 30.05.2017** **Mara Heinrichs** (Marine Geochemistry)
Microbial degradation of phytoplankton-derived dissolved organic matter (master thesis)
Janis Ahrens (Microbiogeochemistry)
TBA
- 13.06.2017** **Nevenka Cakić** (Organic Geochemistry)
New concepts for characterization of coenzyme-A-thioesters
Torben Struve (Marine Isotope Geochemistry)
Sources of Glacial South Pacific dust
- 27.06.2017** **Indra Gottwald** (Organic Geochemistry)
TBA (master thesis)
René Neuholz (Microbiogeochemistry)
The age of submarine hydrothermal plumes – a radium isotope approach
