

Microbiological Colloquium

SS 2018

17:15 h, ICBM Lecture Room W15-1-146

- 04.04.18 **Sina Schorn**, MPI for Marine Microbiology, Bremen
Life style and cell architecture of *Achromatium oxaliferum*
(Host: Heribert Cypionka)
- 18.04.18 **François Thomas**, Roscoff Marine Station, France
The alginolytic system of *Zobellia galactanivorans* as a model for brown algal biomass degradation
(Host: Matthias Wietz)
- 02.05.18 **Matthias Kellermann**, ICBM, Univ. Oldenburg
Vast marine species biodiversity of Indo-pacific waters promotes the search for novel marine natural products (Host: Lars Wöhlbrand)
- 16.05.18 **Jörg Overmann**, DSMZ Braunschweig
Symbiosis in the bacterial world - mechanisms and evolution
(Host: Heribert Cypionka)
- 30.05.18 **Martin Könneke**, Universität Bremen
An emerging view on thaumarchaeal lipids as biomarkers and geochemical proxy (Host: Heribert Cypionka)
- 13.06.18 **Christian Voolstra**, Red Sea Research Center, Saudi Arabia
The metaorganism imperative - we are not alone
(Host: Matthias Wietz)
- 27.06.18 **Henrik Sass**, University of Cardiff, U.K.
The Cryptoshere - viable spores in deep geothermal waters not detectable by standard microbiological techniques
(Host: Heribert Cypionka)

Guests are welcome! - Heribert Cypionka
