Stamp and signature

Information

If you are enrolled at a German university and would like to study an additional degree programme at the University of Oldenburg, this is known as a 'parallel degree programme'.

Once you have received an offer of admission from the University of Oldenburg, you should submit this application form to the new School and enclose the following documents:

- A copy of the letter of acceptance from the University of Oldenburg
- A current enrolment certificate from your university to date stating your degree programme and the number of semesters you have been enrolled at the university as well as the number of semesters you have spent studying the degree programme
- A description of the degree programme at your university to date

The *application form for parallel studies*, signed by the School, should then be sent to the Admissions Office together with your letter of acceptance.

Parallel studies also have implications for the semester fees. In order for us to check and possibly refund the fees, please send us a detailed fee receipt for the semester in question from the other university.
